

Windows 10 File Explorer

File Explorer allows you to browse, search, and manage files and folders. It can be accessed from the Start menu, Taskbar, or Search bar. Downloads, Desktop, Documents, Pictures, Music, and Recent files are some of the locations you can access.

There are two ways to access File Explorer:

1. Click on the taskbar icon. To bring up the taskbar, press the Windows logo key + E.

2. Access it from the Start menu. To bring up the Start menu, press the Windows logo key + X.
